

AMRIT PRATIM BARUAH

9957706203 | abaruah289@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Data Analytics professional with hands-on experience in exploratory data analysis, KPI reporting, data visualization, dashboard development, and analytical reporting using Python, SQL, Power BI, and Excel. Certified in Data Analytics by E&ICT Academy, IIT Guwahati. Backed by 9+ years of operational experience in MIS reporting, stakeholder coordination, escalation tracking, cross-functional communication, and Excel-driven reporting workflows across large-scale enterprise project environments.

TECHNICAL SKILLS

SQL & Databases: PostgreSQL, MySQL — DDL/DML, JOINS, CTEs, Window Functions, Subqueries, Aggregations, Analytical Queries

Python & Libraries: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Scikit-learn

BI, Excel & Dashboarding: Power BI (DAX, Power Query, Star Schema, Data Modelling), Data Visualization, Dashboard Development, Streamlit (Interactive BI Dashboards), Advanced Excel — Pivot Tables, VLOOKUP/XLOOKUP, MIS Workflows, Excel Reporting, Filtering

Analytics & Reporting: KPI Development & Tracking, Exploratory Data Analysis (EDA), MIS Reporting, Business Reporting, Analytical Reporting, Operational Reporting, Ad-hoc Reporting, Trend Analysis, Pareto Analysis, Data Cleaning & Processing

ML & Predictive Analytics: Linear Regression, Logistic Regression, Random Forest, XGBoost, Feature Engineering

Tools: Jupyter Notebook, VS Code, Git, Linux (Ubuntu/WSL basics)

Domain Exposure: Supply Chain & Logistics Analytics; E-commerce Product Profitability Analytics; Telecom Operations (2G/4G/5G RAN, Microwave Backhaul, VSAT), TCP/IP fundamentals

DATA ANALYTICS PROJECTS

Global Job Market & Skills Demand Analysis | Independent Portfolio Project | [GitHub Repository](#)

Tech Stack: PostgreSQL · SQL · Power BI · DAX · Power Query · Data Modeling

- Designed and implemented a PostgreSQL relational database for 787K+ global job postings, modeling fact, dimension, and bridge tables with primary/foreign key relationships and indexes to support scalable analytical querying.
- Performed advanced SQL analysis using JOINS, CTEs, aggregations, filtering, grouping, and HAVING clauses to evaluate salary trends, hiring demand, top-paying roles, and the market demand for technical skills.
- Developed a four-page interactive Power BI dashboard using a star schema, Power Query transformations, dedicated Date table, reusable DAX measures, and interactive visualizations to analyze hiring trends, salary distributions, and skill demand.
- Identified high-paying roles, premium technical skills, and demand-versus-salary trade-offs, delivering an end-to-end Business Intelligence solution from database design and SQL analytics to executive dashboard reporting.

Product Line Profitability & Margin Performance Analysis | Unified Mentor Internship Project | [GitHub Repository](#) | [Live Dashboard](#)

Tech Stack: Python · Pandas · NumPy · Plotly · Streamlit

- Performed EDA on 10,000+ transactional records to evaluate product-level profitability, gross margins, and revenue contribution across three divisions, identifying key performance gaps beneath headline revenue figures.
- Built a KPI reporting framework tracking gross margin (%), profit-to-revenue gap, cost ratio, and margin volatility; applied Pareto analysis to identify profit concentration and portfolio rationalization opportunities.
- Developed a five-module interactive profitability reporting dashboard featuring product leaderboards, margin contribution analysis, Pareto charts, and cost-vs-revenue visualizations — supporting business decision support and analytical reporting workflows.

Late Delivery Risk Analysis & Prediction | Unified Mentor Internship Project | [GitHub Repository](#) | [Live Dashboard](#)

Tech Stack: Python · Pandas · Plotly · Scikit-learn · Streamlit

- Analyzed 180,519 global shipment records to identify delivery delay patterns across regions, shipping modes, and customer segments through structured exploratory data analysis.
- Prepared logistics risk indicators from a 40-attribute dataset using data cleaning, preprocessing, and feature engineering to create structured, analysis-ready inputs for delivery risk classification.
- Applied Logistic Regression, Random Forest, and XGBoost models to generate order-level delivery risk scores; used threshold tuning (0.35) to improve high-risk recall and support operational prioritization.
- Built a four-module operational analytics dashboard for delay risk monitoring, order-level risk scoring, regional trend analysis, and operational action tracking — supporting data-driven logistics reporting and operational decision support.

Electricity Load Intelligence: Time-Series & Demand Trend Analysis | Independent Portfolio Project | [GitHub Repository](#)

Tech Stack: Python · Pandas · NumPy · Matplotlib · Seaborn

- Consolidated 1,100+ fragmented daily electricity load files, historical archives, and hourly weather datasets into a unified time-series dataset for multi-year demand analysis.
- Resolved timestamp inconsistencies, handled missing values, standardized structures, and generated continuous time-series records through systematic data cleaning and preprocessing.
- Integrated electricity load and weather datasets to analyze peak demand periods, weekday–weekend consumption behavior, seasonal load variation, and temperature–load relationships across the Delhi power grid.
- Conducted exploratory time-series analysis using Pandas, Matplotlib, and Seaborn to identify intraday demand trends and seasonal consumption patterns relevant to energy demand monitoring and operational planning.

PROFESSIONAL EXPERIENCE

Data Analytics Intern

2026

Unified Mentor Pvt. Ltd.

- Worked on structured analytics projects involving exploratory data analysis, KPI reporting, dashboard development, and predictive analysis — delivering analytical reporting and business insights using Python, Plotly, and Scikit-learn.
- Applied data cleaning, preprocessing, validation, and reporting techniques across retail profitability and logistics datasets to support analytical reporting and business decision-making.

Implementation Management Engineer

2019 – 2025

Ericsson – Bharti Airtel & Vodafone Network Rollout Projects

Payroll: Integrated Wireless Solutions · LinkQuest Telecom · Aerial Telecom

- Coordinated across RF, RAN, Backhaul, Logistics, and Field Installation teams to track rollout progress, monitor milestones, and support integration activities across 50+ concurrent GSM, 4G, and 5G network rollout sites.
- Prepared and maintained project tracking records, site status updates, issue logs, escalation follow-up reports, and SLA adherence records — providing operational reporting and rollout visibility to project leads and delivery managers.
- Managed escalation coordination and troubleshooting follow-up for integration and commissioning issues; maintained issue resolution records and status updates for cross-functional team reporting and project office visibility.
- Supported network integration and commissioning activities using Ericsson toolsets; coordinated quality validation, EHS compliance checks, and final acceptance documentation as per Ericsson project delivery standards.

Project Coordinator

2018 – 2019

Hughes Communications – Indian Oil Corporation VSAT Rollout Projects

Payroll: Aletheia Technologies Pvt. Ltd.

- Served as regional SPOC during Indian Oil Corporation VSAT rollout; coordinated field installation teams, tracked issue resolution status, maintained escalation follow-ups, and supported SLA adherence through regular status reporting and customer coordination.
- Maintained project status trackers, approval records, resource allocation logs, and issue monitoring reports using Excel (Pivot Tables, VLOOKUP, filtering) while coordinating with clients, field engineers, and internal teams for rollout reporting, execution tracking, and cross-functional coordination.

Project Coordinator

2016 – 2018

Samsung – Reliance Jio (RJIL) & Ericsson O&M Projects

Payroll: Shivam Infocom Pvt. Ltd.

- Coordinated field installation teams across Samsung–RJIL 4G rollout sites; monitored rollout progress, tracked site completion status, maintained escalation records, and prepared project status reports for operational visibility and stakeholder coordination.
- Maintained MIS and operational records for approximately 100 technicians in the Ericsson/Airtel O&M project using Excel (Pivot Tables, VLOOKUP/XLOOKUP, filtering) — covering resource tracking, compliance monitoring, GRN processing, timesheet verification and approvals, and daily MIS reporting activities.

EDUCATION

Bachelor of Engineering (Electrical) — Royal School of Engineering & Technology, Gauhati University

2016

Higher Secondary (Science) — Shrimanta Sankar Academy, AHSEC

2009

CERTIFICATIONS

Data Analytics Certification — Accredian, in collaboration with E&ICT Academy, IIT Guwahati

TCP/IP Networking Fundamentals (Aligned with Cisco CCNA 200-301) — Udemy
